Pick a tile on DPS

Painpoint solved: Link to the policy somewhere in the landing screen/list to direct users to policy docs

Generating new or already got a list?

If something: see the list

Print functionality should be accessible from the generated list

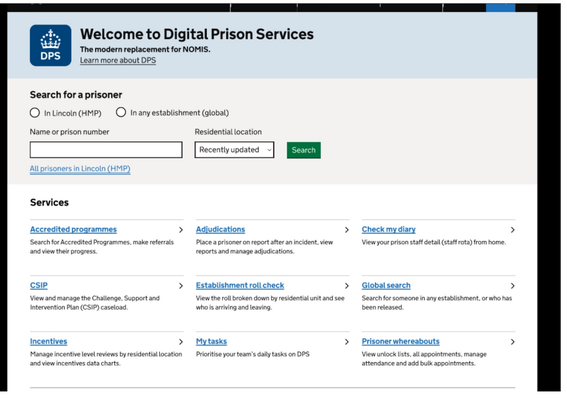
User can print list with key data points:
- Date generated
- Selection % of prison
- Reserve % of selection
- Selections
- Oustanding
- Primary/reserve lists

If nothing: Screen shows empty selection

Specify % of prison population to be included in sample list

(Manual entry)

Generate list with reserve list auto generating same size as selection

We need to be able to print even prisoners who have been tested in the previous 30 days, but the user needs to be able to still test them


We need to be able to record
