Must have

Print lists option, with ability to print list of all prisoners or those awaiting an MDT

Random algorithm of current population

Officers need to prove they've taken prisoners off reserve list in order they are listed, so that they are protected from complaints from prisoners

Two lists generated, Random and Reserve

Enter list selection as percentage, plus a value for the reserve list

Prisoner details on list; List Number, NOMS Number, First Name, Last Name, Location, In/Out, Release Date, Selected?, Reason Not Selected, Notes, plus the selected prisoner's upcoming scheduled activities

Generate only available for current month

Only CADM (admin) can delete a generated list

Access role to generate list; separate to complete tasks and view only role

Ability to indicate whether a prisoner was tested or not, and reasons why

Reasons for not testing listed:
Adjudication
Discharged
Discharged
Fatal Flaw Chain of Custody
Internal Medical Appointment
Medically Unfit
Offending Behavior Prog
Abandoned Due To Operational Reasons
Out of establishment
Refused
Scheduled Discharge
Transferred
Transferred
Medically Unfit
Visit

Should have

Handy if those chosen could be flagged as new to the prison (e.g. within the last 30 days) or tested within the last 30 days

Analysis of the current in-progress work:

- % Breakdown of test complete & outstanding
- % Breakdown of weekend testing so far

Warning of outstanding tests from previous month

Enhanced UX around utilising the reserve list (ie using the first person from the top of the list automatically)

Could have

Link to policy documents/PSO, and policy snippets contained in the UI

Manage drug test coordinators screen (who is doing what)

View change/filter to show outstanding all or completed

Default to percentages based on prison roll

Automating/ easing the entering of selection/ reserve lists

Notifications to drug test coordinators based on number of test required at strategic points through the month

Won't have

Don't set parameters for the list that's generated - needs to stay random
